A
Probability density, Beta(a,b)
Threshold, θ
$a = 2, b = 10$
$a = 5, b = 10$
$a = 10, b = 10$
$a = 20, b = 10$
$a = 50, b = 10$
$a = 100, b = 10$
Social coupling, β
Light level, L
B
Probability density, LogNormal(μ,σ)
Threshold, θ
$\mu = 1, \sigma = 1.5$
$\mu = 1, \sigma = 1.0$
$\mu = 1, \sigma = 0.8$
$\mu = 1, \sigma = 0.6$
$\mu = 1, \sigma = 0.4$
$\mu = 1, \sigma = 0.2$
Social coupling, β
Light level, L
C
Probability density, Weibull(k,l)
Threshold, θ
$k = 1.5, l = 4$
$k = 2.0, l = 4$
$k = 3.0, l = 4$
$k = 4.0, l = 4$
$k = 5.0, l = 4$
$k = 6.0, l = 4$
Social coupling, β
Light level, L
